

# Maximize the investment you've made in your Roland printer.

Using a wide format print, sign design software that works seamlessly with Roland's VersaWorks RIP software is the most efficient, cost effective way in which to produce vibrant, dazzling graphics that leverage the market-leading innovations found in the Roland printer line.

## State of the art color support

Spectacular results using metallic, spot color and white inks.

SignLab for Versaworks Edition includes leading edge color design tools. Unique metallic, spot color and white ink support enhances designs and expands production possibilities by creating stunning visual effects.

**Roland Color palette's included;**  
Roland Color System Library palette, Roland Metallic Color Library (12 primary metallic colors) palette, Roland Metallic Color System Library palette (250 metallic colors) installed within SignLab for VersaWorks.

**Color profiles taylor-made for VersaWorks**

Automatic on screen color management setting for working with VersaWorks.

# Amazing design tools

SignLab for VersaWorks is an all-in-one bitmap and vector design software.

Complete your entire design in SignLab for VersaWorks and then send directly to VersaWorks. No need to import/export files between multiple design and production applications

## Enhanced text layout tools

Complete, professional text composition layout and editing tools including text special effects. Includes +1100 fonts.

## Automated design tools such as Instant Replay™.

Save hours of design time by applying previously, intricately created special effects and design elements into new designs simply by dragging and dropping.

# Production tools that support multiple workflows

SignLab for VersaWorks facilitates production.

Perfect for use with any Roland Print or Print/Cut device including the XF-640, VS Series, XC 540MT and VersaSTUDIO BN-20 printers. Leverage the amazing effects possible with Roland metallic ink technology by having a seamless interface between a sign software package specializing in specialty ink design and Roland's VersaWorks RIP software.

## Seamless support with the latest version of VersaWorks RIP software

As Easy As File>Print to VersaWorks. Print directly to queue "A" or "B"

## "Send to" plug-in's.

Send jobs directly to SignLab for VersaWorks from design applications such as Corel, Illustrator and PhotoShop.

## Automated, precise contour cut interface.

Enables the application of contour cut lines with enhanced speed and accuracy on graphics regardless of their complexity.

## Unmatched vectorization.

Convert low resolution bitmap images into crisp, clean vector image is minutes using a simple Vectorization wizard interface.
