

FOR IMMEDIATE RELEASE....  
Ottawa Ontario, Canada. August 2017

**Digital Factory OKI TT Edition™ provides enhanced color management and simplified workflow for the OKI 8432WT toner printer**

CADlink Technology is pleased to announce that it has extended its OKI toner printer support to include the latest release into the transfer media customization market, the **OKI 8432WT** printer. CADlink's specially designed Digital Factory OKI TT Edition™ was released earlier in 2017 and also supports the following printers;

- OKI™ C711WT (North America)
- OKI™ C920WT (North America)
- OKI™ Pro 7411WT (Europe)
- OKI™ Pro 9420WT (Europe)

CADlink print software is recognized worldwide as specializing in white toner and ink management. "Digital Factory OKI TT Edition™ provides a great deal of workflow advantages over print driver solutions and other RIP software options..", says Michael Chramtchenko CADlink Technology Director of Marketing, "but where the value really exists is in the automated handling of white toner usage when printing on dark substrates. Not only does it simplify the process a great deal, but it also reduces toner costs and improves the look and feel of transferred graphics."

Digital Factory OKI TT Edition™ comes complete with professionally created color profiles for widely used transfer media as well as providing advanced color management options ensuring the most vibrant color prints every time. The software also provides streamlined, flexible production workflow support by including production plug-ins for image preparation as well as plug-ins that send jobs directly from design applications as well as supporting every commonly used file format including .pdf.

Please visit <http://www.cadlink.com> for additional information or call 800-545-9581 (North America only), ++44 (0) 1462-420222 (Europe).
