

FOR IMMEDIATE RELEASE

CADlink Technology to feature wide variety of software applications at FESPA, Hamburg May 8-12, 2017

Hall B6, Stand B6-E69 will be the focal point for FESPA attendees wishing to streamline their design and production workflows in a variety of different markets including; sign making, engraving, screen printing as well as the direct to garment, UV, transfer media (dye sublimation/toner), textile and wide format digital printing applications.

CADlink will focus primarily on newly released features and have product specialists on site that will be able to provide informative demonstrations for all of them. Of particular interest will be new printing technology included within many of the CADlink brand RIP software products and also found in CADlink's flagship sign making, large format display software, SignLab v10 Print and Cut. Already recognized as a leader in print and cut technology, this product is now even more powerful as a result of the new feature set. A complete list of features can be found here, <https://www.cadlink.com/index.php/en/signlab-version-10>.

Also featured on the stand will be CADlink's engraving software, EngraveLab. Already bundled alongside industry-leading engraving devices, EngraveLab is also available as a stand-alone application and supports virtually all engraving controllers available today including devices using the Ruida™ and Leetro™ type controllers. New tools for laser as well as rotary engravers will be on display. More information on EngraveLab products can be found here, <https://www.cadlink.com/index.php/en/engravelab-home>

Be sure to visit the CADlink stand for information on all products as well as special show pricing offers.

CADlink Technology. The software specialists.
