FOR IMMEDIATE RELEASE

CADlink Technology Corp announces release of SignLab v10

OTTAWA, ON – April, 2016.

The latest version of the world's most widely used sign making, large format display software product will be available at the end of April 2016. The much anticipated release of SignLab version 10 was first previewed in early March at FESPA 2016 in Amsterdam and will be officially launched at both the ISA Sign Expo in Orlando as well as Sign and Digital UK in Birmingham, UK in mid-April.

"The response that we have had from our reseller channel as well as end-users who have seen the preview to this release has been outstanding", says Michael Chramtchenko, CADlink Director of Marketing. "We believe that the terrific feedback we have encountered is a direct result of our commitment to involving all of our stakeholders-- end-users, resellers and manufacturing partners-- throughout the development process and having SignLab v10 include the new features that provide the most impact in the day to day running of their businesses."

Already seen as the industry standard in sign making software, SignLab v10 includes an entire new series of design and production workflow tools. The integration of these tools and CADlink's expertise in driving a wide variety of output devices (printers, cutters, engravers, etc) provides a complete software solution that simply cannot be found in any desktop publishing or other sign making software packages on the market today.

SignLab v10 includes dozens of new features including the following;

- Layer Manager w/ InstantReplay functions
- TrueShape, contour cut and clipped object nesting
- New special effects filters
- Unicode standardization. All languages supported.
- Windows™ 10, 8 and 7 support (64/32 bit)
- ClipArt Manager with direct online access to 1,000,000's of images

For a detailed information, including access to a FREE online trial version of SignLab v10, please visit http://www.cadlink.com or call 800-545-9581.

 About CADlink Technology Corporation

Since 1987, CADlink Technology Corporation has been developing software applications for sign making, engraving, screen printing, garment decorating, routing and digital printing. Products include SignLab™, EngraveLab™, FilmMaker™, ProfileLab™, and Digital Factory™.

CADlink also specializes in custom software development for 3rd party OEM partners within a variety of niche markets that require design, printing, cutting and machining support.

CADlink's corporate office is in Ottawa, Canada, and CADlink has branch offices in the USA, the UK, and Germany. CADlink software is available in over 50 countries worldwide, in 14 languages, through more than 200 dealers.
